Bitcoin And Mobile Payments: Constructing A European Union Framework (Palgrave Studies In Financial Services Technology)

Synopsis

This book provides a critical analysis of The European Union's regulatory framework for mobile payments and bitcoin. Chapters discuss the creation of the EU single market for e-payments and combine legal analysis with comparative case studies in their exploration of the regulatory challenges surrounding e-payments. The contributing authors analyse the key economic and legal issues of the development of bitcoin and mobile payments within the EU framework through a comparative lens. They cover topics ranging from user data and funds protection and the stability of the payment system to the competitiveness of the EU market. Providing a comprehensive and methodological guide to the bitcoin and mobile payments in Europe, this book will prove an illuminating and informative read for academics, students and policy makers with an interest in the impact of innovation on payment systems.
