Synopsis

The action-packed series by Michael P. Spradlin returns. Each book covers a genetically engineered superpredator wreaking havoc on the environment. It's all come to this. Dr. Catalyst has had enough of Emmet Doyle's meddling. Time after time, Emmet and his friend Calvin Geaux have stepped in to ruin his plans, just when he'd released one of his genetically engineered killer species into the Florida environment. This time, Dr. Catalyst is releasing his most deadly creation yet. It's a terrifying lone hunter, bred to stalk and destroy one specific target -- Emmet Doyle.

I love books like this. I hope there is never a man like Calvin's evil grandfather. I couldn't put this book down. The animals were scary as well as the psycho grandfather.

love it

Great great great book series! I started reading Killer Species with my son and before you knew it I was reading them by myself too. Every book keeps you on edge wondering what is going to happen next and they actually include real information about the Everglades, so these books do have some educational value as well. However, Killer Species is science fiction, so not everything is factual, but very exciting to read! I recommend all four of these books 100%!

Awesome read! My 7th grade class loved the series. You can't go wrong with a series that boys and girls keep begging you to let them read more!

I love reading this book to my grandchildren and they were full of anticipation waiting on this story saga. We had already read the first book and this was the grand finally of the story and it lived right up to the first book.

My 12 year old grand son loves this series. Hard to find in stores. Really good value and fast delivery.

My 9 year old daughter loves these.

A continuation of #3 that doesn't match the credibility or adventure of the first 2 books. I will not be buying another of these.
