Raising Ryland: Our Story Of Parenting A Transgender Child With No Strings Attached

Synopsis

This powerful, moving storyâ "which has already touched more than seven million through a viral video created by the Whittington familyâ "is a motherâ 's first-hand account of her emotional choice to embrace her transgender child. When Hillary and Jeff Whittington posted a YouTube video chronicling their five-year-old son Rylandâ 's transition from girl to boy, they didnâ 't expect it to be greeted with such fervor. Beautiful and moving, the video documenting Hillaryâ 's and Jeffâ 's love for their child instantly went viral and has been seen by more than seven million viewers since its posting in May 2014. Now for the first time, they tell their story in full, offering an emotional and moving account of their journey alongside their exceptional child. After they discovered their daughter Ryland was deaf at age one and needed cochlear implants, the Whittings spent nearly four years successfully teaching Ryland to speak. But once Ryland gained the power of speech, it was time for them to listen as Ryland insisted, â œI am a boy!â • And listen they did. After learning that forty-one percent of people who identify as transgender attempt to take their own lives, Hillary and her husband Jeff made it their mission to support their childâ "no matter what. From the earliest stages of deciphering Ryland through clothing choices to examining the difficult conversations that have marked every stage of Rylandâ 's transition, Hillary Whittington shares her experiences as a mother through it all, demonstrating both the resistance and support that their family has encountered as they try to erase the stigma surrounding the word â œtransgender.â • In telling her familyâ 's story, she hopes she can assist the world in accepting that even children as young as five, can have profound and impactful things to say and share.â What emerges is a powerful story of unconditional love, accepting others for who they are, and doing whatâ 's right, regardless of whether those around you understand it. â

Hillary Whittington talks with Andrew Solomon Andrew Solomon is the author of *Far From the Tree* and *The Noonday Demon*, among other books. Andrew Solomon (AS): How were you able to know for sure that your child was authentically a boy and that he wasn't just a girl going through a neurotic phase? Hillary Whittington (HW): As a stay-at-home mom, I had a very close relationship with Ryland starting from birth. After his deaf diagnosis, I spent hours teaching Ryland ASL, and after the cochlear implant surgery, teaching him to speak. Around his third birthday, which was after having over a year of sound, he started telling us, "I am a boy." We laughed initially, thinking it was just childhood confusion, but over time Ryland persisted with a very masculine presentation. To him, being a "tomboy" wasn't enough. Typically, tomboys are not ashamed of their bodies or being seen as a "girl" in the public eye. Additionally, our original beliefs that this may just be a phase were changed as his expression and discomfort continued to strengthen. Ryland began to show signs of shame and sadness when anyone saw him as a girl and if mistaken for a boy in public, he lit up and stood taller. As a mom, I knew there was something deeper going on inside of my child. AS: How was having a deaf child similar to or different from having a trans child? When you have a child who has two marked differences, how do you decide which one to focus on when? HW: Without a doubt, having a deaf child prepared me for having a transgender child. When we decided to go forward with the cochlear implant surgery, I knew the Deaf community did not agree with our decision. I prepared myself for the backlash, but remained strong, as I felt we were doing the appropriate thing for our young child. By the time we figured out that Ryland was also transgender, I had become very experienced in facing the objection of others. Certainly, it was now a much larger community who would potentially question our decision to support Ryland as a boy, but once again, I knew we were doing what was best for our child. Ryland has been very successful in the use of his implants and does very well with his hearing. Due to this, most of our focus has shifted to supporting his being transgender and educating the world on what that means. AS: What has the role of faith been in your journey to acceptance of your child and your fate? How different would your experience have been if you hadn't had faith behind you? HW: Honestly, I was angry with God in the beginning. It seemed cruel that Ryland was faced with yet another tough challenge in his young life. I felt even more betrayed when many of our critics identified as Christian. I realized I had a choice: I could throw away my faith entirely, or be the

example of a loving and kind Christian. I must show others that it can be possible to have faith and also support your child as either transgender or gay. I believe wholeheartedly that we were chosen to walk this path and my God loves everyone, regardless of their gender identity or sexual preferences. If I didn't have faith in my life, it would be much more difficult for me to understand why we were chosen to walk this path. AS: How did you get from so much sadness to a place of such celebration? Do you feel like the love that informed the painful aspects of this process is the same as the love that brought you through it? HW: Once I was able to come to the understanding that Ryland could still have the opportunity to live a very happy, prosperous, and fulfilling life, an enormous weight was lifted from my shoulders. I realized that life truly is what you make of it, and at the end of the day, if the Ryland is happy, I am happy. In the grand scheme of things, it is the differences we have as human beings that makes us unique and should be celebrated, and Ryland is the child he is because of his differences. If we were to sit around feeling sorry for ourselves, or our situation, the world would respond to us negatively.

The incredible story of one family's unconditional love for their transgender sonWhen Hillary and Jeff Whittington posted a YouTube video chronicling their five-year-old son Ryland's transition from girl to boy, they didn't expect it to be greeted with such fervor. Beautiful and moving, the video documenting Hillary and Jeff's love for their child instantly went viral and has been seen by more than seven million viewers since its posting. Now, for the first time, they tell their story in full, offering an emotional, moving account of their journey alongside their exceptional child. After they discovered their daughter Ryland was deaf at age one and needed cochlear implants, the Whittings spent nearly four years successfully teaching Ryland to speak. But once Ryland gained the power of speech, it was time for them to listen as Ryland insisted, "I am a boy!" • Hillary and her husband, Jeff, made it their mission to support their child "no matter what. From the earliest stages of deciphering Ryland through clothing choices to examining the difficult conversations that have marked every stage of Ryland's transition, Hillary Whittington shares her experiences as a mother through it all, demonstrating both the resistance and support that their family has encountered as they try to erase the stigma surrounding the word transgender. What emerges is a powerful story of unconditional love.

Mother of two Hillary Whittington has advocated for her children for years, serving as a classroom volunteer and public speaker. Through Raising Ryland, Hillary hopes to bring hope, strength, and humor to her experiences as the parent of a transgender child. In sharing her story, she encourages

readers to have the courage to make the world a better place for all of us.

I was inspired by their story. I met Hillary at the Harvey Milk Diversity Breakfast in Palm Springs May 19th 2017 and had to buy this book. Anyone who has had any questions about what it's like to be Transgender or be the parent of a Transgender child; This is a "must read". It will open hearts and minds. Sending love to a very loving family.

I can only feel admiration and gratitude for this mother writing a book that will help every parent's child in years to come. We all want our children to be happy, even if it means adapting our heart to different heartbeats. I am anxiously waiting for this book to be translated into many languages so it can also reach other cultures. Thank you for taking the word courage to a new level: A very compassionate one. A profoundly human.

Absolutely great book. Very interesting read about a topic I'm hoping to learn more about as I go into counseling. I want to work with adolescents and children and this is concept I'm trying to learn about from people who have experienced it firsthand. When adults decide to transition (say, Caitlyn Jenner), people make the argument that it is a choice and they somehow developed those feelings due to conditioning or society or family...some outside source basically. When you have a child, especially children as young as Ryland, it's very clear this isn't the case and I want to learn more about that. Easy to read and portrays the emotions and experiences of the family very well. I definitely recommend for anyone, not just those who are interested in counseling or psychology.

After you read this book you will never again question if children really know they are in a body that doesn't match their brain at an early age. With shocking clarity, this mom discusses the early years. She candidly discusses her feelings and the family dynamics impacted by Ryland's journey.

very well written book about the huge challenges faced by Hillary and her husband while raising a transgender child. I feel it provides some insight into transgender people and how this way of being manifests itself very early in life.

Super good book . A very amazing family. Lots of love for their children.

This book is really helpful in giving an understanding of what happens with the child and family.

Enlightening and helpful to share from a parental perspective. Such caring parents.
