Human Anatomy Laboratory Manual With Cat Dissections (8th Edition)

Synopsis

For the one-semester human anatomy laboratory course. **Get the most out of your human anatomy lab** With 30 exercises covering all body systems, a clear, engaging writing style, and full-color illustrations, *Human Anatomy Laboratory Manual with Cat Dissections*, Eighth Edition provides everything needed for a successful lab experience. This edition features new Visual Summary Tables for presenting complex information, new **“Why This Matters”** boxes that help relate the lab activity to a real-life or clinical example, new colored Review Sheet art, and new full-color, body movement photos.

Book Information

Spiral-bound: 576 pages

Publisher: Pearson; 8 edition (January 16, 2016)

Language: English

ISBN-10: 0134255585

ISBN-13: 978-0134255583

Product Dimensions: 8.9 x 0.8 x 10.8 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: 3.2 out of 5 stars 5 customer reviews

Best Sellers Rank: #7,449 in Books (See Top 100 in Books) #42 in Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Anatomy & Physiology #58 in Books > Science & Math > Biological Sciences > Anatomy #293 in Books > Textbooks > Education

Customer Reviews

For Elaine N. Marieb, taking the student's perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known. Dr.

Marieb has partnered with Benjamin Cummings for over 30 years. Her first work was Human Anatomy & Physiology Laboratory Manual (Cat Version), which came out in 1981. In the years since, several other lab manual versions and study guides, as well as the softcover Essentials of Human Anatomy & Physiology textbook, have hit the campus bookstores. This textbook, now in its 10th edition, made its appearance in 1989 and is the latest expression of her commitment to the needs of students studying human anatomy and physiology. Dr. Marieb has given generously to colleges both near and far to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by funding a staffed drop-in center and by providing several full-tuition scholarships each year for women who are returning to college after a hiatus or attending college for the first time and who would be unable to continue their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation and updating of one of the biology labs in Clapp Laboratory at that college. Dr. Marieb also contributes to the University of Massachusetts at Amherst where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university. In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor. Dr. Marieb is an active member of the Human Anatomy and Physiology Society (HAPS) and the American Association for the Advancement of Science (AAAS). Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings Interactive Physiology® CD-ROM series. When not involved in academic pursuits, Dr. Marieb is a world traveler and has vowed to visit every country on this planet. Shorter term, she serves on the scholarship committee of the Women's Resources Center and on the board of directors of several charitable institutions in Sarasota County. She is an enthusiastic supporter of the local arts and enjoys a competitive match of doubles tennis.

Lori A. Smith received her Ph.D. in Biochemistry from the University of California at Davis. Before discovering her passion for teaching, she worked as a research scientist and project leader in the medical diagnostics industry. In 1999, she joined the faculty at American River College in the Biology Department. Currently she teaches anatomy and physiology and microbiology to pre-nursing and mortuary science students at American River

College. Starting in 2005, she began co-authoring Pearson's PhysioEx: Laboratory Simulations in Physiology and has continued to co-author several versions of the software and lab manual. She is also co-authoring Pearson's Human Anatomy & Physiology Lab Manual. Dr. Smith has been awarded an Instructor of the Year by the American River College Associated Students for her commitment to serving students, and she is a member of the Human Anatomy and Physiology Society (HAPS) and the National Association of Biology Teachers (NABT).

For anyone buying this, it is not the Human Anatomy Textbook, though from what I can tell it has all the same info the textbook has in it with an addition to some sections that will help you review yourself. I will update this status later when I know for sure it can take the place of the textbook. From what I understand the Textbook is not only more expensive but lacks the review sections. More to come

This book is good for the pictures and diagrams... But not the cat dissection ones. Pretty lousy in my opinion. Utilize the Internet for better explanations and instructions for the dissection.

Perfect book for my class! It's a lab book but almost like a textbook too with all the information in it!

good quality...look brand new

I am so upset that I am renting a LAB BOOK and cant print off my assignments. This is bad marketing and bad on kindle-
