# Physical Geography Laboratory Manual For McKnight's Physical Geography: A Landscape Appreciation (11th Edition)

## Synopsis

Physical Geography Laboratory Manual for McKnight's Physical Geography: A Landscape Appreciation, Eleventh Edition offers a comprehensive set of lab exercises to accompany any physical geography class. The manual is organized to meet your needs, providing the flexibility to pick and choose a series of short lab exercises each week. Lab exercises incorporate Google Earth's explorations and provide review of concepts such as Doppler Radar and Continental Glaciation, while more than 40 QR codes now link you to a variety of media resources including Google Earth videos, color topographic maps and images and satellite movie loops. Also new to this edition is a lab on soils, and a field GIS lab exercise. High quality color stereoscope images and aerial photographs are now included in lab manual to give you an integrated picture of locations and landforms.

Darrel Hess is professor of geography at City College of San Francisco, where he served as chair of the Earth Sciences department from 1995-2009. He regularly teaches physical geography, economic geography, and human geography. Hess received his B.A. in geography from UC Berkeley and his M.A. in geography from UCLA. Before graduate school he served in the Peace Corps in Korea, and before teaching full-time he worked as a writer, photographer, and audiovisual producer. Hess served as T.A. to Tom McKnight at UCLA. He began working with McKnight and Pearson as author of the text's Study Guide starting in the Fourth Edition and as author for the Lab Manual starting in the Fifth Edition. He became a full time co-author of the Ninth Edition,

and became sole author of the Tenth Edition. Hess has contributed to the development of the Geoscience Animation Library and has partnered with many geoscience teachers and writers in the development of the CA edition.

While I am not happy about having to take yet another class for school, I was pleasantly surprised by the quality of this book. It's spiral bound so pages are easy to turn and the colors included are bright and vibrant. This book needs to be bought used if you are taking a class on campus as there are assignments that need to be pulled out and turned in. If you are taking an online class where you just had to read the info you may be able to purchase used. Either way, this book contains excellent information and will definitely help you learn more about this fascinating subject.

I rented Physical Geography Laboratory Manual for McKnight's Physical Geography: A Landscape Appreciation for \$30.00 and was not happy with the entire manual!! All of the Exercises were torn out and through the Semester I had to rely on a Class mate to copy each exercise, which cost me more money at 10 Cents per sheet!!

Pages were missing that were vital to the work I had to do for my class. I'm in the middle of the class and now I have to figure out how to do my assignments. Would give it 0 stars if I could.

This manual is good but it is missing chapters. If you have a friend taking the same class, just copy theirs. I believe it is missing about three chapters, but the PLUS to this is a lot of ANSWERS to the questions are written in the book. So if you are struggling with the class or science. Rent this BOOK or buy it. It is helpful. If it had all of the CHAPTERS I would have gave it a FIVE STAR.

I rented this text from RENTU. The text was missing numerous critical pages. RENTU sent the typical "we are not responsible for missing disks". However, missing pages in a text are not the same as a missing supplemental disk.

Missing about twelve pages when the manual arrived, not acceptable for a rental at all.

It is missing most of the lab pages, therefore I have to purchase the book again.

Missing about 30 pages on the book, but as expected of a used book. Shipping took about six days.

overall a pretty good book.
