Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

Robin Bernard is the author of the National Geographic children's books *Insects* and *A Tree for All Seasons*.

The idea of this book is great. It is short and packed with photos. I think it does a good job of teaching kids about the changing seasons. I bought this for my 2 year old. However, she didn't really appreciate it until she was 3. Now she can skim through it herself. There are a bunch of these little science photo books that National Geographic puts out. I don't know if I would buy them again, now that you can get so many pictures on the internet, and of better quality. The photos here seem a bit dated, compared to what NatGeo now produces. Classic take on the four seasons. This book is lovely, but in a world of digital devices, I don't know if this book will stay a classic.

Perfect book to introduce the seasons to young children. Beautiful photographs.

Stunning pictures and easy to understand information. Both my 2 and 5 yr old sons really enjoyed this book - so much so that they requested some of the other books by NG pictured on the back cover.

Kids loved it.

Gear book. The picture are great. They are easy for my baby to see. I love all of the books from National Geographic.

My baby loves nonfiction books with real pictures. She enjoys these books, and I love reading them to her. I learned something new in each of the books from this series!

Love the text!
