Grade 6 Up-- Arthur, at 16, was a single mother. She went on to get a graduate-school degree, and states that she has a fine career and a happy marriage. She writes in a personal, reassuring vein, as a friend to those young women whom most observers generally consign to economic, social, and intellectual doom. Her theme is the need for teens to assert control of their own lives by holding on to dreams and setting goals as they make informed decisions. She explores options that must be faced from the time the pregnancy is first suspected, cautioning against the mechanism of denial and urging prompt medical supervision. While objective, the author does share her reservations about teenage marriages entered into "under the gun." Detailed, practical information and suggestions about what to expect and where to seek assistance make the book particularly useful. The unique perspective that sees teen pregnancy as an opportunity for growth rather than as a lifelong tragedy should make this accessible to its target audience. Arthur promotes additional titles by her publisher in the text, and includes many in the bibliography. --Libby K. With rare honesty, a former teenage mother shares her own experiences while putting forth many other options. This is a handbook about feelings, including some--like apathy--that are rarely discussed, with emphasis on success stories whatever the choice. For Arthur herself, the experience has been both a struggle (fighting the urge to call her daughter a sister) and a joy (gaining confidence in making choices). With many lists of suggestions (stress reducers; getting realistic about the father's role; pros and cons of abortion; planning for unplanned sex; dietary precautions; going to school; etc.), the pages become an empathetic workbook in decision making. In its practicality and insistence on motivation and persistence as keys to success, this nicely complements Kuklin's *What Do I Do Now?* (p. 730) as must reading during a crisis--or better yet, before it occurs.
