# The New Food Activism: Opposition, Cooperation, And Collective Action

## Synopsis

The New Food Activism explores how food activism can be pushed toward deeper and more complex engagement with social, racial, and economic justice and toward advocating for broader and more transformational shifts in the food system. Topics examined include struggles against pesticides and GMOs, efforts to improve workers' pay and conditions throughout the food system, and ways to push food activism beyond its typical reliance on individualism, consumerism, and private property. The authors challenge and advance existing discourse on consumer trends, food movements, and the intersection of food with racial and economic inequalities.

## Customer Reviews

"A convincing roundup that demonstrates that the food movement is (finally) coming of age, The New Food Activism is a chronicle of a dozen important victories around agriculture, justice, public health, and more, which points the way toward a future in which food is increasingly a focus of crucial rights movements. A must-read for food organizers and their allies." —Mark Bittman, food columnist and author of How to Cook Everything "People want to eat ethically, and to do that, they need to care about the well-being of workers throughout the food system. This book highlights a promising direction for food activism, one that puts the lived experience of those who grow, cook, and serve our food at the center of its call for systemic transformation." —Saru Jayaraman, author of Forked: A New Standard for American Dining "The New Food Activism is one of the most important books on food this century. It is required, inspiring, and challenging

reading for every student of food, every 'foodie,' as well as every grower, worker, and eater in today's food system. In this groundbreaking book, the authors develop a powerful critique of our food system and our mainstream food movements. In the process, they provide diverse, inspiring examples of food activism that foreground race and class equity while pushing against industrial, corporate control of our food. This unique book and the food campaigns it analyzes are critical to the possibility of true food justice. This book nourishes new realities in our food system."
