Marijuana Horticulture: The Indoor/Outdoor Medical Grower's Bible

Synopsis

With 512 full color pages and 1120 full color photographs and illustrations, Marijuana Horticulture: The Indoor/Outdoor Medical Grower's Bible is the most complete cultivation book available. The Fifth Edition of the former Indoor Marijuana Horticulture: The Indoor Bible was originally published in 1983, when it immediately became a best seller. More than 500,000 copies of the Indoor Bible are in print in Dutch, English, French, German and Spanish. New greenhouse and outdoor growing chapters make this a book both indoor and outdoor growers will keep under thumb. The other 15 chapters (17 total) are all updated with the most current information, completely rewritten and significantly expanded. For example, Dr. John McPartland contributed an all new medical section - The books credits list more than 300 contributors and reads like a who's who in the world of cannabis cultivation.

Customer Reviews

If you want to grow weed, this is the only book you need! --David Bienenstock - Editor, High Times Magazine, January 11, 2006
Fun, informative, illustrative, hands-on and authoritative. Whether for approved medical use patients or prohibition pragmatists. --Allen St. Pierre, Executive Director, NORML, Washington, DC, January 2006
The new Bible is without a doubt the best grow book on the market. --Phil Kilv, Editor in Chief, Weed World Magazine, January 2006

Cervantes is a world-renowned expert on indoor, outdoor, and greenhouse cannabis cultivation. He puts more than thirty years of expert cannabis growing knowledge and hands-on experience at your fingertips with his books, articles, photographs, and a new DVD. His expert advice has guided millions of growers worldwide to apply simple, effective horticultural techniques to high-yield closet, basement, backyard, and guerilla gardens. In his monthly question-and-answer column, "Jorge's Rx," the flagship of High Times magazine's cultivation section, Cervantes provides definitive solutions to growers' problems. He also pens a regular column in Soft Secrets magazine. High Times and Soft Secrets boast the highest circulation in North America and Europe. Cervantes still finds time to contribute feature cultivation articles to High Times, Burst High (Japanese), and a dozen European cannabis magazines. Multilingual Cervantes also speaks at eight international cannabis fairs in Europe every year. With five books in print and more than a half million books sold, you can find his works in Dutch, English, French, German, and Spanish. Soon books will be available in Italian, Japanese, and Russian.

Great book with a lot of easily digestible information with high quality pictures. It felt like all the info I have scoured the web for, but in one well organized place... without the misguided opinions of the less experienced. With that being said it has everything you need to know, especially from the perspective of someone knowing next to nothing, but at times it left me wanting more in depth info on certain subject. Its a great source of information and a good place to start if nothing else.

This book has a lot of great information, but it is put together in a somewhat sloppy way. It doesn't really offer any step-by-step information, but if you're willing to dig through it all then you can get all the information you need. The chapter on lighting needs to be updated to account for LED lighting. So it's helpful, but be prepared to read all the way through before you start, and hope that you get an edition that isn't 10 years old, if such an edition exists.

An extremely thorough book! I seriously doubt that anyone would need any other book on the subject.

Great book, lots of good info for new growers. Full of info, pictures, tips, and has a thorough index. We have referenced this book daily since we got it, and it's helped us out of some rather 'pesty' situations. Some of the pics are pretty amazing!

A very interesting book if you are keen to explore the uses of Marijuana that are not emphasised in today's society. Marijuana needs to be legalised throughout the world and people need the benefits of the oil it produces as an option to today's medicines. People need to be educated on its medicinal use and not brain washed into believing it is only used to get high. In the past our medicines were made with this herb.

Best and most complete book on indoor and outdoor growing I have ever seen. I never realized I knew so little on the subject. Covers all aspects of growing and lots of ancillary topics. HIGHLY RECOMMENDED

Excellent book for anyone in the health care service industry, to become familiar with medical marijuana, all facets of it, and best to have the Jorge Cervantes beginners guide and the Jorge Cervantes encyclopedia, I decided to buy all three as my first books on this fascinating aspect of health care that is becoming more and more prevalent across the USA and the world as an acceptable supplement to a more healthful living. The book is very well put together, I am impressed with the structure of the book, and all the information that is clear and concise.

Even though I'm not presently living in an area that this book is useful to me, the information therein is informative and interesting nonetheless.
