1 2 3 Count With Me (Trace-and-Flip Fun!)

Synopsis

This brilliant, innovative book offers an engaging new way for children to discover and learn basic counting concepts. By running their finger along large, grooved numbers, children can explore each shape. Colorful lift-the-flaps on every sturdy page further reinforce easy learning. Each board page features a number (1 through 20) that a child can trace with their finger, a flap to lift to find a surprise, and bright illustrations! The bright and graphic illustrations include cuddly animals and familiar objects. Also, included are helpful hints on how to extend the fun with guessing games, writing exercises, and more!

Age Range: 2 - 4 years

Grade Level: Preschool and up

Customer Reviews

My 8 month old enjoys this book and the "A is for Apple". I like them because they're kind of like the Montessori sand letters in the aspect that the numbers can be traced or letters for the "A is for Apple" book. It is so nice that the arrows might help him understand which direction to write the number when he is older. At this time he likes to look at the book, open the flaps and we trace the numbers with his fingers or hand.

my son loves tracing his fingers along the numbers. The only drawback is the last item of each number is under the flap.. which when you open it, blocks other items... so it might be a bit

confusing for my toddler

I used this book, for my special needs toddlers. It's proven very durable and attention grabbing.

This book is terrific! It has flaps to lift (my toddler loves flaps) and numbers that you can trace with a finger. Plus simple addition problems with answers under the flaps. a great way to introduce a little one to numerical concepts!

Felt the condition was a little worse than describe. The cover was more worn than expected.

Anything educational AND hands-on for my active (was 2) now 3 year old... marvelous!

My daughter loves this!

My 3 and 1 year old children loved the A is for Apple book by this author so I decided to give this number book a try too. I'm glad I did. It has nice illustrations and my children like the interactive features like flipping the window to reveal the hidden pictures and tracing the numbers. I love that it's both fun and educational.
