See Something, Say Nothing: A Homeland Security Officer Exposes The Government's Submission To Jihad

Synopsis

One day after a prominent U.S. Muslim leader reacted to the November 2015 Paris attacks with a declaration that the Islamic State, also known as ISIS, has nothing to do with Islam, President Obama made the same assertion. Who exactly is the enemy we face, not only in the Middle East but also within our borders? Is it "murderers without a coherent creed" or "nihilistic killers who want to tear things down," as some described ISIS after 130 people were brutally slain and another 368 injured in a coordinated attack on Western soil that authorities say was organized with help from inside France's Muslim communities. After the Paris attacks, Obama, himself, described ISIS as "simply a network of killers who are brutalizing local populations." But how much do words and definitions really matter? According to the legendary military strategist Sun Tzu, if "you do not know your enemies but do know yourself, you will win one (battle) and lose one; if you do not know your enemies nor yourself, you will be imperiled in every single battle." When the Department of Homeland Security was founded in 2003, its stated purpose was "preventing terrorist attacks within the United States and reducing America's vulnerability to terrorism." The Bush administration's definition of the enemy as a tactic, terrorism, rather than a specific movement, proved consequential amid a culture of political correctness. By the time President Obama took office, Muslim Brotherhood-linked leaders in the United States were forcing changes to national security policy and even being invited into the highest chambers of influence. A policy known as Countering Violent Extremism emerged, downplaying the threat of supremacist Islam as unrelated to the religion and just one among many violent ideological movements. When recently retired DHS frontline officer and intelligence expert Philip Haney bravely tried to say something about the people and organizations that threatened the nation, his intelligence information was eliminated, and he was investigated by the very agency assigned to protect the country. The national campaign by the DHS to raise public awareness of terrorism and terrorism-related crime known as If You See Something, Say Something effectively has become If You See Something, Say Nothing. In See Something, Say Nothing, Haney — a charter member of DHS with previous experience in the Middle East — and co-author Art Moore expose just how deeply the submission, denial and deception run. Haney's insider, eyewitness account, supported by internal memos and documents, exposes a federal government capitulating to an enemy within and punishing those who reject its narrative. In this well-documented, first-person account of his unique service with DHS, Haney shows why it's imperative that Americans demand that when they see something and say something, the servants under their charge do something to prevent a cunning, relentless enemy from carrying out its stated aim to "destroy Western Civilization from within."

Customer Reviews

I would like to give this book 10 stars out of 5 as it may well be the defining pivot point for our nation in the war against Islamic terrorism. Mr. Haney has placed his life and family in serious jeopardy by thoroughly documenting the government's lack of willingness to protect the nation from a deliberate, explicit and strategic attack from within our borders. Haney, who speaks and writes Arabic and is one of the nation's foremost experts on Islam (having studied it for 20+ years) and presents a thoroughly documented narrative of the current administration's efforts to deliberately undermine the investigation capability of our law enforcement patriots. After each chapter, I couldn't help but stand in utter amazement and exasperation. This administration is taking the same route as the World War II British Prime Minister Arthur Neville Chamberlain, and the Munich Agreement. Chamberlain's effort at least was well intentioned. Not so with the current administration's subterfuge. This administration is on the wrong side of History. This is a must read for every citizen, especially the Gen Xers, Gen

YerÃfÃ¢Ã â ¬Ã â,,ø and Millennials who will inherit this serious, possibly irreversible situation. Mr. Haney is a simple scientist and a true patriot.

Following 9/11 like many American's, I began reading up on Islam. So as I made my through Mr. Haney's book I was already familiar with most of the acronyms for the various Muslim Brotherhood affiliated groups such as CAIR, ISNA,MSA which I like to collectively refer to as Muslim Brotherhood termites burrowing into our national security infrastructure.I knew about John Brennan signing off on letting these groups edit out of our counterterrorism manuals anything they found objectionable. I knew about Michelle Bachmann's group trying to call attention to this insidious sabotage only to be mocked. I knew about Hillary Clinton getting cozy with the OIC. What I wasn't aware of is just how deeply penetrated the DHS is.I was extremely pleased to find out that Mr. Haney and Stephen Coughlin are allies in this battle. One thing that hopefully might come from this expose is that the CYA alarm is loudly ringing inside the DHS and the Pentagon.The whole DHS fiasco saddens me to no end for a special reason. While serving in the Navy I was stationed at the Washington facility on Nebraska Avenue which later became the DHS HQ. The Navy took that property during WWII and it became the US counterpart to the UK's Bletchley Park where much of the early work was done on breaking the German Enigma codes and the Japanese naval codes known as JN-25. The two facilities worked hand in hand. Some of the primitive room sized computers developed by Allen Turing and others were installed at Nebraska Avenue and ran 24/7. Whenever I think about the DHS taking over that facility I think man oh man, what a come down. I sincerely hope this depressing situation can be reversed.One last point. In a sane world this book would stop Hillary Clinton's run for president dead in its tracks, but we don't live in sane world anymore.

This book is one OMG after another! I heard the authors on the radio Mon nite, got the Kindle edition Tues, finished it Thurs & am reading it again. I could not put it down. What is going on in this country--& around the world--is much worse than I than I thought which makes it all the more scary. I don't know what our govt is thinking but by the time these people wake up, it may be too late. My only complaint about this book is that it jumps around a whole lot, time-wise but it's a very complicated situation so maybe it had to be done it that way. It's just chilling!!

A heroic account from a true American hero. Phil Haney's whistleblowing story gives an easily digestible description of how our administration is facilitating our own demise. By placing a disingenuous policy of protecting the so called civil rights of our enemies ahead of protecting our

nation's security, our government victimized one of its greatest assets- Haney- and in so doing, through the destruction of years of tedious work Haney had assembled, made victims out of our country- including those directly affected by the San Bernardino attack. The book is a must read for anyone concerned about how we counter the threat we face. It is a must read for anyone who is touched when in the presence of true heroism. And it is a must read for anyone who values our country and civilization as it was intended. Bravo Haney!

A new book has hit the shelves which chronicles the fundamental transformation of American policy to neuter efforts by law enforcement to combat terrorism both domestically and in foreign countries. Titled *See Something Say Nothing: A Homeland Security Officer Exposes the Government's Submission to Jihad* it is written by Philip B. Haney, a former Homeland Security agent and Art Moore, editor for World Net Daily. The book is clearly written, names names and paints a picture of how government agencies tasked with stopping terror under both President George W. Bush and President Barack H. Obama have moved from a law enforcement/research based/investigative model to a civil rights/civil liberties model. This transformation is key to understanding why the State Department, FBI, Department of Homeland Security (DHS), state and local law enforcement failed in places like San Bernardino, California. The book graphically details the decline and fall of the Great War on Terror (GWOT).

As you prepare for election please read Mr. Haney's phenomenal book. Mr. Haney presents an extraordinary whistle-blower account of Federal government intelligence surveillance failures at the U.S Customs and Border Protection. Haney directly links recent terrorist tragedies on American soil to his intel research which was intentionally covered up and prevented from application within the Agency to save lives.

This is one of the most informative books I have read. Everyone in America needs to educate themselves as to why there is a disconnect with those perpetrating the attacks and not being able to identify them. This book is an excellent start, IMHO.
