The Renal Drug Handbook: The Ultimate Prescribing Guide For Renal Practitioners, 4th Edition (Ashley, The Renal Drug Handbook)

Synopsis

The Renal Drug Handbook offers information compiled from the UK Renal Pharmacy Group and features drug monographs guiding physicians in how to prescribe, prepare, and administer drugs to patients undergoing renal replacement therapy. Also provides a practice-based review of drug utilization in renal units across the UK. Purchasers of The Renal Drug Handbook receive a free 30-day trial to the The Renal Drug Database. A code to activate the trial may be found on the inside-front cover of The Renal Drug Handbook; the trial is activated by entering the code on the Redeem page of this website, accessible from the homepage. "The Renal Drug Handbook provides essential information on drug dosing in patients with different levels of kidney function. As in previous editions, the logical format makes it easy to use and simple to follow. Included in this update are over 130 new drugs and a new section on drug metabolism and excretion in each drug monograph. Wide dissemination of this 4th edition will help healthcare professionals who prescribe and more importantly protect their patients from avoidable harm. Well done to the authors for maintaining this amazing resource." — David C Wheeler, Professor of Kidney Medicine, University College London, and President, Renal Association

Book Information

Series: Ashley, the Renal Drug Handbook

Paperback: 264 pages

Publisher: CRC Press; 4 edition (May 28, 2014)

Language: English

Customer Reviews

Caroline Ashley is the Lead Specialist Pharmacist for Renal Services at the University College London Centre for Nephrology and Transplantation, Royal Free Hospital. She has nearly 25 years'

renal experience, and her major areas of interest are transplantation and auto-immune renal disease. Caroline was involved in the development of the Renal National Service Framework, and the NICE guidelines on Immunosuppression in Renal Transplantation, Renal Anaemia, and Acute Kidney Injury. She is the coeditor of both The Renal Drug Handbook and the Introduction to Renal Therapeutics, and sits on the editorial board of the British Journal of Renal Medicine. She has been the Chair of the UK Renal Pharmacy Group since 1996, and was made Associate Professor of Pharmacy Practice, UCL School of Pharmacy in 2011. Aileen Dunleavy is the Senior Specialist Pharmacist for Renal Services at the University Hospital Crosshouse, NHS Ayrshire and Arran, with 20 years' renal experience. Her major areas of interest are dialysis, anaemia and CKD. She became an independent prescriber in 2008. She is the co-editor of The Renal Drug Handbook and has contributed to the Introduction to Renal Therapeutics, Drugs in Use and Adverse Drug Reactions. She has been a committee member of the UK Renal Pharmacy Group for more than 15 years.

I am in healthcare and often need this type of information. This book does not contain any unique information that could not be found in prescribing information (package inserts). It is overpriced for the content and quality of the book (cheap backing and paper). I have NO conflict of interest in this, but would recommend Aronoff GR, et al. Drug Prescribing in Renal Failure: Dosing Guidelines for Adults and Children. 5th ed. Philadelphia, PA: American College of Physicians; 2007. If you go this route do NOT buy the electronic version as it is too difficult to navigate and printing is extremely difficult.
