Science Of Survival

Synopsis

The most useful book you will ever own. Built around the Hubbard Chart of Human Evaluation, Science of Survival provides the first accurate prediction of human behavior. Included on the chart are all the manifestations of an individual's survival potential graduated from highest to lowest, making this the complete book on the Tone Scale. Knowing only one or two characteristics of a person and using this chart, you can plot his or her position on the Tone Scale and thereby know the rest, obtaining an accurate index of his or her entire personality, conduct, and character. Before this book the world was convinced that cases could not improve but only deteriorate. Science of Survival presents the idea of different states of case and the brand-new idea that one can progress upward on the Tone Scale. And therein lies the basis of today's Grade Chart. Dianetics revealed the previously unknown Reactive Mind that enslaves Man and the auditing procedures to get rid of it. But that was only Plan A, laying the groundwork for further research into life force. Here, then, is theta (life force) and MEST (the physical universe of Matter, Energy, Space, and Time) and their interaction, which is life itself. Therein also lie the anatomy of the Tone Scale and both the reason for an individual's downward descent and the means to ascend upward. This book is written around the now legendary Chart of Human Evaluation, providing a complete description of the reactions, traits, and behavior patterns of an individual at any given emotion. By knowing just one or two characteristics of a person, you can know the rest - his or her entire personality, conduct, and character. Then, with entirely new types of processing, one can unleash the full inherent theta potential of a being to move up to the highest levels of freedom. Here, then, are the fundamental breakthroughs that are the basis of the Grade Chart itself. Among the subjects contained herein are:

The Tone Scale
The basic laws of theta - affinity, reality, and communication
The Dynamics
The pattern, appearance, conduct, and behavior of individuals and groups as regards emotion, speech, handling of communication, reality, sexual behavior and children, the environment, worth to society, ethics, truth, courage, responsibility, persistence, and more
The basic principles of processing
The mechanics of aberration
New types of processing, including straight memory and lock scanning - processing that frees an individual's theta that is trapped in the reactive mind
How to diagnose and audit any case

Science of Survival is the essential handbook for every auditor and the means to predict human behavior in life itself. And that's why it's the most useful book you will ever own.

Incredibly interesting book. I'm not a Scientologist. I understand the controversy surrounding the religion, but even with all of that, this is something that is equal parts strange as it is fascinating. It almost reads like a technical operating manual for being a human written by aliens. Hubbard invented his own universe of terms, concepts, systems, and methods that are very interesting and at times a bit funny, and odd, but at times seem pretty intuitive and valid. I wouldn't dare read this book because it is so insanely long and filled with Scientology terms. However, many of the weird terms you hear in Scientology are explained in this book. I listened to the audio version which is 16 hours long! If you're interested in the subject, but don't wish to take part in it, this is a great way to learn about it. No doubt Hubbard was a gifted writer and thinker.

Thank you.

This is a very high level vocabulary book. I got through it but literally had to look up 100s of words to fully grasp what was being presented. But using what I learned is pretty cool.

Terrific! L. Ron Hubbard has written an excellent insight and guide to human behavior. I love the tone scale that comes with the book also. A must have book for anyone studying human behavior!

I received the book and it was in great condition.

Excellent

life saver of the book... great data that will help you on life

I will respect everyone's beliefs, but this is just not for me.
