Customer Reviews

I noticed several lodging locations were not properly located on this map, (which created a real issue for me) I expect if I started really checking, there would be many more. Also, a number of points of interest that are shown on the "give away" maps are not shown. Unless you are doing something exceptional, save your money, the widely available "give away maps" are sufficient for driving around Dominica. For more detail for locations of lodging, food, gasoline can be found in: "Dominica, Discover the Real Dominica" by Anna McCanse

Though I have not seen other maps of Dominica, this inexpensive (and readily available) map gives a perspective of the island's geography.

This is about one of the only full island maps you can find of Dominica. It has good details and I practically wore it out during the week we were there. The only downside is that its not waterproof, so don't leave it out in the beautiful moist air of the island too long. Definitely recommend this map, and I'm a map nut!

I don't know why there isn't a map JUST for Dominica! I didn't need one for Saint Lucia, but it is ok.

Good details and coordinates for GPS use. I will be adding extra lines for GPS. Has elevation contours but not well marked. Not as good as USGS topo map, but much better than than what I have seen.

Would like to find a waterproof / water-resistant version of this map, but the detail is exceptional for this small island - nevertheless, the rugged terrain of Dominica means not every variation in terrain can be covered here..

Very helpful negotiating the twisty mountain roads of Dominica. It was good to click off villages as we went along so we could know just how far we'd come and how far we had to go.

I used this map to plan our trip to Dominica and navigate when we got there. It was much better than the small one we got with the car rental.
