My Book Of Numbers 1-120 (Kumon Workbooks)

Synopsis

Kumon workbooks are based on the "Kumon Method", an educational philosophy that aims at unlocking the full learning potential of each individual child. The Kumon Method introduces learning concepts in an incremental, step-by-step approach, allowing children to master new skills easily and without anxiety or frustration. As a result, children gain confidence in their abilities and are motivated to learn on their own.

Book Information

Paperback: 80 pages

Publisher: Kumon; Act Csm Or edition (January 26, 2004)

Language: English

ISBN-10: 4774307041

ISBN-13: 978-4774307046

Product Dimensions: 8.3 x 0.3 x 11.7 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 64 customer reviews

Best Sellers Rank: #16,464 in Books (See Top 100 in Books) #63 in [Books > Education & Teaching > Schools & Teaching > Early Childhood Education](#) #75 in [Books > Education & Teaching > Studying & Workbooks > Workbooks](#) #394 in [Books > Children's Books > Activities, Crafts & Games > Activity Books](#)

Grade Level: Preschool and up

Customer Reviews

Kumon workbooks are based on the "Kumon Method", an educational philosophy that aims at unlocking the full learning potential of each individual child. The Kumon Method introduces learning concepts in an incremental, step-by-step approach, allowing children to master new skills easily and without anxiety or frustration. As a result, children gain confidence in their abilities and are motivated to learn on their own. Over 3.5 million children around the world use the Kumon Method to develop their math and reading skills. Kumon Math and Reading Centers help students become successful, confident and self-motivated learners. But it's not just the Kumon Method that makes our workbooks special. It's also the care and research that goes into the editorial content, design and quality of the books. Our editorial experts have more than two decades of experience in producing books that are both fun and educational. Our designers create illustrations that attract

and delight children. And the quality of our books is the best of any workbook on the market, with extra thick paper and the best available print quality. From pedagogy to paper, every one of our workbooks has been carefully crafted with your child's best interests in mind.

Books look great for my 5-6yr old Kinder girl. I homeschool and we did Singapore books but needed a bit more to supplement math skills. These books are high quality, look perfect for us! Writing 1-120 workbook pages look great. It's hard to buy school books online.

Perfect for NON T-K 4yr old. Good art work. Thick card stock paper. Fill in the blank certificate of completion in the back. There are a LOT of dot-2-dots/ every 2nd page. They could have come up with something a little more creative. I do not like the pages have the tiny answer in the box. My smarty pants has learned not to think for himself, but to copy the little answer. This would be great for kids who are learned and as well as kids who just need some practice.

We just found out that our son's new school would like all incoming Kindergarten students to be able to count to 100 and be able to identify their double digit numbers. Since he can currently count to 13 and only recognizes 0 - 10, we bought some workbooks to work on over the spring and summer. We bought this and the Hooked on Math Kindergarten Activities book. I was worried that he would find the Kumon book less exciting, but he really enjoys doing these worksheets (and he is not a kid who usually enjoys sitting at a table type work). I had only planned for him to do 2 pages per night - but he likes to do 3 or 4. (This may slow down as he gets to the more complicated pages in the back.) In addition to learning the numbers, he is also developing his fine motor / handwriting skills. Each page only takes a few minutes, and we reward him with a sticker for each page completed. We do 15 minutes of homework time, 5 or 6 nights a week. We like this Kumon book and will be buying others from the series.

One of the requirements by the end of Kindergarten is counting and writing to 100. I used this workbook as part of my summer bridge program for a child who needs to learn at a slower pace who will be enter Kindergarten in the fall. This workbook really doesn't require a lot of writing so it keeps the child from getting burnt out. It involves the child by suggesting the parent encourages the child to point and say the numbers. Other activities include dot-to-dot, fill in the missing numbers and following directions by circling a certain group of numbers. This book would also be great for a preschool age child ready to advance further.

I bought this for a five year old and I was very glad I did. I feel like this is perfect for the 4-6 age group. The spaces to write the numbers are big enough for "beginning writers". Kumon books are really well done.

This is a great book to help you get ready for kindergarten. One of the curriculum standards is that the children are able to count to 30. My 5 year old daughter saw the connect the dots puzzles where you count out loud, and connect the dots, and she couldn't get enough of this book. She basically sat for 45 minutes trying to do every single one, and she didn't mind counting out loud. There are also many other repetitive exercises to help you get to know your numbers. She was interested in those as well. But so far we have at least one exercise that is a hit with her. I would highly recommend buying this product if you have a 4 year old and you want to get her ready for kindergarten. I will buy this product again when my 2 year old is able to complete the exercises at the right age.

Exactly the practice my children 5 and 7 years needed to be proficient at writing reading and recognizing numbers 1-120.

It's Kumon, it has to be good
